INTRODUCTION

VIETDOGE (VD) (\$VDOGE) isn't just a token—it's an army. Our Soldiers rally around a shared mission: build practical crypto utility and push global crypto adoption forward. The Hall of Valor ranking system turns participation into progression—complete missions, earn XP, and rank up to flex your status in the Army.

See the live leaderboard here:

vietdogecoin.com/hall-of-valor.

At the core of Vietdoge is the Barracks – Our community focused hub which lays the foundation for the ecosystem. Here expansion of staking ("Bunkering"), XP missions, raffles/lotteries, and play-to-earn minigames that feed the Hall of Valor, and emphasises our Dogetag P2P transfer system.

We're mobile-first: live on iOS and Android, so Soldiers and creators can engage, play, earn send, and earn on the go—keeping the culture moving at meme speed while the rails stay simple, fast, and non-custodial.

VISION & MISSION STATEMENT

Grow a resilient, community fueled by a rich utility ecosystem where currency and culture reinforce each other.

We achieve this through continuous development, and a community focused approach.

TOKEN DETAILS

Token Name / Ticker: VietDoge (\$VDOGE)

Chain / Standard: BNB Smart Chain, BEP-20

Total Supply: 69,000,000,000 \$VDOGE (fixed)

Taxes: 0% (no transfer tax)

Ownership: Contract renounced

TRANSPARENT ADDRESSES

We publish core program addresses so anyone can verify balances on-chain.

Initial Liquidity (LP) — 11,440,000,000

TOKENOMICS (LISTING-READY, FINAL)

Total Supply: 69,000,000,000 \$VDOGE

Allocation	Percent	Amount (tokens)
Initial Liquidity (LP)	16.6%	11,440,000,000
Airdrop (program total)	8.0%	5,520,000,000
Founder / Team	8.0%	5,520,000,000
Liquidity Additions (future LP)	27.4%	18,920,000,000
Marketing & Partnerships	13.0%	8,970,000,000
Staking / Game Rewards	27.0%	18,630,000,000

AIRDROP PROGRAM

Program Total (cap): 5,520,000,000 \$VDOGE

Distribution Wallet:

[0xFa96ab5a0Db13DB0B5bCC8FFe481Ab66C56A1d1e](https://etherscan.io/address/0xFa96ab5a0Db13DB0B5bCC8FFe481Ab66C56A1d1e)

Method: Questing, community events (Discord & Telegram),

Telegram Mini-app airdrop minigame.

UTILITY STACK

BARRACKS (ENGAGEMENT HUB)

The Barracks is VIETDOGE's hub containing a growing network of utility including;

- **Hall of Valor: Missions → XP → Ranks:** Core of the ecosystem. Quests and community participation reward and level up your profile in the Hall of Valor, unlocking further features, opportunities and rewards
- **Bunkering (staking):** Lock \$VDOGE, earn emissions and event rewards.
- **P2E gaming ecosystem**
- **VD Casino**
- **Community focus raffles / lotteries / minigames:** event-driven prizes tied to \$VDOGE flows held daily within the community socials

HALL OF VALOR

The Hall of Valor (HoV) is Vietdodge's ranking and leveling system; play, participate, and engage with the ecosystem to earn XP. Users will be able to engage with all aspects of the Ecosystem and earn XP by doing so. Current and future aspects to earn XP include;

- Staying active in socials (Discord and Telegram, UXC – bot driven xp)
- Engaging in barracks activities, including, games, VD Casino activities
- Bunkering
- P2p transfers via Dogetag

Earning XP will level up users in unlocking certain features, aesthetics and novelties that will distinguish dedicated soldiers in the community. Additionally higher rewards will be distributed as a Soldier levels up.

The HoV is intended to reward dedicated users, and will be integrated in all current and future developments in the Vietdodge Universe. As the ecosystem becomes more established, as will the advantage of ranking up in the HOV.

BUNKERING

Bunkering is VD's decentralized staking system by which token holders commit their assets to a network protocol in exchange for rewards. Bunkering leverages token ownership as a mechanism for network participation, security, and reward distribution.

For the VietDoge ecosystem, Bunkering represents both a utility function and a community engagement mechanism. By locking tokens into smart contracts, participants not only earn compounding passive rewards but will gain XP within the HOV.

Staking locks 90 days minimum, with rewards claimable instantaneously, freeing up \$VDOGE to circulate within the community.

ECOSYSTEM

The VD Ecosystem refers to the community and infrastructure around the project. With continuous development, and growing expansion, the Ecosystem is the provides the platform for users to engage, earn XP and gives VD its inherent value.

\$VDOGE is the fuel of the VD ecosystem. It is the input and output to interact with the utility of VD. Games, community activities, VD casino rolls rely on \$VDOGE for a circular operating economy \$VDOGE is used to interact with the Ecosystem and its community, and by design, rewards users for their participation – Do – 2 Earn – the more involved a user is, the more they will receive.

With a strong community foundation, and through a network effect through enjoyable and growing Ecosystem, \$VDOGE aims to capture and hold its user base by providing enjoyable content.

Further, within the Ecosystem a series of sub currencies enable Web-2 to Web-3 interaction for a fast user interface. In the current stage of the project the following Sub-currencies support off chain \$VDOGE transactions.

Rations

Rations, are provided by “The Dealer” who lives within The Barracks, an act as the interface currency for gaming transactions and rewards, as well as VD Casino plays. Rations can be purchased for \$VDOGE and used within these features. Users can then “Trade” their Ration winning with the dealer for \$VDOGE.

The Dealer enables smooth transaction between \$VDOGE and rations enabling users to seamlessly interact with these aspects of the ecosystem – The economy of rations is nonexistent and therefore remain stable pinned to the price of \$VDOGE.

Rations can be obtained through community events, reward drops and traded off-chain between users via in game features or wagering.

War Chest & Keys

The War Chest is VDs weekly lottery system. Users can participate by purchasing Chest Keys within the Barracks for \$VDOGE. Currently entries are capped to a maximum of five (5) entries per user. Five (5) winners a drawn weekly with odds presented at the time of purchase. Keys may be dropped through community events and Barracks activities

VCoins (Airdrop Program only)

Vcoins are (at the time of conception) used as the “Telegram Airdrop Program” currency. These coins will be obtained by playing and participating in the \$VDOGE Airdrop campaign game. These coins are untradeable but represent a user’s stake in the Airdrop program. At the end of the Airdrop period, the Airdrop will be distributed to the community holding Vcoins. A users holdings of Vcoins will represent their share comparative to the cumulative holding of Vcoins. For clarity, the airdrop will be distributed to each user using the following formular:

$$\frac{\text{Users Holdings (Vcoins)}}{\text{Total Coins (in distribution)}} \times \text{from the Airdrop Event}$$

COMMUNITY

The Community is Everything. But if you're reading this, you already know that.

Our community focused approach is achieved by the following:

- **Daily events promoting engagement and rewarding those who show up**
- **All development will have a community focused approach**
 - o **Building in public**
 - o **Community feedback and direction votes**
- **Enabling and promoting community participation within the project including ambassador partnerships, and networking opportunities. We want to give long-term followers a turn in the seat**
- **Open door policy to our users, AMA's regularly, inviting feedback**

DOGE-TAG P2P

The Doge Tag is VD's Peer-2-Peer transfer system handled within the VIETDOGE Mobile App. Scan or tap to pay via QR codes and short Doge-Tags (usernames/handles) for direct wallet-to-wallet transfers. Further, Request-to-Pay by creating a link/QR asking a payer for a specific amount with a memo; perfect for stream tips or tickets.

Users can embed Deep-links & widgets: Drop payment buttons into bios, overlays, chats, or game UIs for streamlined Crypto payments or donations;

- **Receipts on-chain: Every transfer is verifiable; non-custodial by design.**
- **Zero token tax: Only network gas applies.**
- **Open dev hooks (roadmap): Simple SDK/REST for apps, bots, and games to trigger Doge-Tag flows.**

DOGE Tag Flow:

1) A fan scans a creator's Doge-Tag QR → confirms amount → sends \$VDOGE/\$BNB/\$CAKE from any BSC wallet.

2) A tournament organizer posts a Doge-Tag link → players pay buy-ins on-chain; receipts are public.

3) A game uses the SDK to issue rewards or collect entry fees seamlessly.

MOBILE APPS (iOS & ANDROID)

The VIETDOGE APP is live and available to download on mobile devices. It will act as the main interface to the Barracks, Ecosystem, and P2p system;

- iOS app: Live; Doge-Tag scanner, send/request flows, creator mode, notifications.
- Android app: Rolling out; feature-parity with iOS in progress.
- Roadmap: Deeper wallet-connect, on-device QR generator, and in-app mini widgets for streams and further Barracks intergrations.

ROADMAP (HIGH-LEVEL)

- Q1 2025: Contract/TGE; iOS app live; Zealy ops; Doge-Tag v1 QR + links; Barracks prototype.
- Q2 2025: Android app; Bunkering (staking) live; Barracks quests + Hall of Valor v1; creator/streamer beta integrations; Telegram Mini App (Doge-Tag Pay & Profiles) — public beta.
- Q3 2025: Listings/market depth; Raffles & minigames; Doge-Tag SDK (bots/APIs/widgets); merchant tooling; Telegram Mini App v1 global rollout.
- Q4 2025: Cross-chain Doge-Tag experiments; Barracks v2 games; expanded partnerships and P2P use cases.

FUTRE DEVELOPMENTS

Our Developers are dedicated to growing the VIETDOGE Ecosystem, with a community focus approach to utility and in general... just enjoyable content. No noise. We love our work and we hope you do too.

Some things coming;

- Hall of Valor rewards (ongoing)
- Mobile App development, with full Ecosystem integration
- Continuous Ecosystem and Barracks Drops
- VD Casino modules, including multiplayer wagering
- Socials activities and games
- User Personalization
- Ecosystem wide Ration integration
- TG Game drops (ongoing)
- Real world drops and merch
- **Let us know what you'd like to see**

GOVERNANCE & UPDATES

- **Announcements:** Official site, Telegram, Discord, and X.
- **Change Control:** Any change to tokenomics or vesting is announced with a before/after table and transaction links.
- **Transparency Dashboard:** Live page showing bucket funding (LP/Marketing/Staking/Liquidity Additions) with links to BscScan.
